and strend to procuring patents for new inventions in the United States Great Britais, Frames, Belgium, Holland, Austtria, Spain, etc., etc. We have constantly employed under our personal supervision a competent board of Scientific Examiners, which enables us to dispatch with great facility a very large amount of business. Inventors are reminded that all matters intrusted to our care are strictly confidential, and hence it is unnecessary for them to invent the expense of attending in person. They should first send us a sketch and description of the invention, and we will carefully examine it, state our opinion and the expense of making an application, if deemed new and worthy of it. Models and feee can be sent with safety own any part of the country by express. In this respect New York is more accessible than any other city in our country. Circulars of information will be sent free of postage to any one wishing to learn the preliminary steps toward making an application.

Having Agents located in the chief cities of Europe, our facilities for obtaining Fureign Patents are unequaled. This branch of our husiness receives the especial attention of one of the members of the firm, who is prepared to advise with inventors and manufacturers at all times, relating to Foreigu

Inventors and manuscular that instructively and competent agents should be employed in securing patents, as great care is necessary in the preparation of the papers, as well as integrity in taking proper care of the casefund; the inventor is duly invented with his legal rights. Parties introsting their business in our hands can rely on prompt and faithful attention. Most of the patents obtained by Americans in foreign countries are secured through us; while it is well known that the largest proportion of patents applied for in the United States, go through our vertex.
